

1353 West Fulton / 220 N Ada

Chicago, Illinois

This 30-story, 310-foot-tall tower will provide 345,000 square feet of residential and retail space as well as a 196-vehicle parking structure. A 1,000-square-foot inset outdoor cafe will be included as well as approximately 16,500 square feet of retail space.

The majority of the tower will consist of 305 apartment units. Residents will have access to a 29th floor amenity space with a large outdoor area and a raised pool. The structural system includes RC core walls and gravity RC perimeter columns as well as a post-tensioned concrete flat plate floor system and a belled caisson foundation.

Han Ding served as a project engineer during his tenure at SOM.
