

Hangzhou Gate

Hangzhou, China

The Hangzhou Gate Greenland Center, a 64-story, 302-meter-tall, office and hotel twin-tower with retail center. This 530,000 sq. ft. development serves as an icon in the major visual promenade for the Olympic Expo center. The towers have a dual structural system comprised of an RC core, plus perimeter moment frames of RC spandrel beams and composite SRC columns. A ballroom is located between the towers and has a 60-meter long-span, steel drap roof and steel arch bridge.

Han Ding served as a project engineer during his tenure at SOM.
